Centaure

Audio and visual Performance

Duration: 40 min

Centaure is a live audio & video performance by Franck Vigroux (music) & Kurt d'Haeseleer (video)

Centaure is a postdigital road trip to a dystopic future. It's a virtual 'safari' to a world populated by cloned creatures and mutations of species that seem to have been artificially rebuilt from contaminated DNA.

Man has disappeared, absorbed by technology, which has become anthropomorphic. Everything breathes, smells, rot, transforms ... The grass, the trees, the water, the clouds, everything is contaminated with a barely visible, but omnipresent technology.

Human flesh has exploded and has morphed with machines to give birth to a perverted new nature.

Kurt d'Haeseleer

Kurt d'Haeseleer is the artistic director of the Werktank, a production house for media art in Bierbeek, that has its roots in the former artist collective the Filmfabriek.

d'Haeseleer himself produced several videos and (interactive) installations, e.g. Scripted Emotions, Fossilization and S*CKMYP, which took part in international festivals and shows in Rotterdam, Tokyo, Montreal, Paris, Berlin,...

He also works regularly as a video designer for theatre, dance and opera and makes his own performances. He will create the videodesign for the Ring-cycle in the Scala of Guy Cassiers and worked with the likes of Ictus, Georges Aperghis, Transparant, Kollektif Barakha, Isabella Soupart, Jon Hassell, Annabel Schellekens, Joji Inc, TUK, Peter Verhelst, Köhn, ...

d'Haeseleer's work focuses on the visualisation of the dynamic of information. He translates the all-encompassing presence of media into meta-images. Media presence is symbolized through layers of sticky pixel-textures, noise and interactivity. Special effects play an important role in his work that can best be described as a 'pixel drama' or 'pixel soap' and which can be found in the border zone between painting, video clips, cinema and performance. In his work the special effect is the message.

d'Haeseleer is well known for his extreme video manipulations. He manipulates images by forcing them to react to the parameters of other images. With this approach, he can only partly foresee how the image will appear. The result is a process that strongly resembles developing analogue photographs, where it is always a surprise to see the result, or even alchemy, but that is in fact entirely digital.
